IPC Eagle

24/25 Gallon, 28", 32" - Traction Drive

High Productivity

Large solution capacity
in a minimum external
space

Extensive running time,
large battery
compartment

Solution Control with
automatic stop

Brush Control with
delayed automatic stop

Automatic Scrubbers

CT 90

High Performance

-  CFS (Center Flow System) Solution distribution from brush center
-  CWS (Constant Weight System) Ensures maximum scrubbing results
-  Exclusive squeegee system assures high performance at low cost
-  High quality / high performance vacuum motor

Ergonomics, User Friendly

-  Great maneuverability due to optimum weight distribution
-  Great working visibility
-  Designed to assure Minimum noise levels
-  Easy to use control panel
-  Battery level indicator
-  Recovery tank discharge hose at maximum height
-  Recovery tank can be tilted for ease of cleaning
-  On board charger optional
-  External battery charger plug

Low Maintenance Costs

-  Inlet and outlet filters for maximum solution tank protection
-  AFS (Anti Foam System) and shut off sensor protect vacuum
-  Squeegee blade can be used on 4 sides before replacement
-  Squeegee assembly and blade replacement without tools
-  Easy access to internal compartments

Competitive Advantages

Exclusive squeegee system assures high performance

Incomparable drying results even on the most difficult surfaces due to a very unique design.

Large tank capacity in minimum external space

24/25 Gal (90-95 Ltr) capacity makes this model very unique in its category.

Solution control with automatic stop

Saves water and chemicals. Solution flow stops and starts upon brush activation.

Maximum protection for the vacuum motor (water level sensor)

1. The vacuum motor is mounted in the highest part of the machine and is protected by a filter and water level sensor.

2. When the recovery tank is full, the left LED lights up and the vacuum motor shuts down. The right LED indicates when the cleaning solution has reached the reserve and there is enough solution for about two minutes.

Brush control with automatic delayed stop

Saves brush wear and protects the floor surface. Brush rotation stops (3 sec. delay on traction drive) and starts upon brush activation.

Recovery tank can be tilted

Easy to rinse and clean with smooth internal finishes.
