COVERAGE FORMULAS

Environmental cleaning plays a key role in preventing the spread of contagious pathogens. However, many current cleaning and sanitizing practices negatively impact human health and the environment. The Zero Hazard sanitizing process is a systematic method for environmental cleaning and sanitizing that aims at reducing harm to human health and the environment while improving the hygiene of a facility's environment.

EFFECTIVE AGAINST PATHOGENS

Zero Hazard has been shown to be effective against pathogens such as Bacteria, Spores, Fungi, Algae, and Mold.

SAFE FOR ALL INDUSTRIES

Our treatment is safe for use for many different industries including, but not limited to: transportation, schools, gyms, restaurants, medical, dental, warehousing, churches, convention centers, casinos, funeral homes, hotels, office buildings, day care centers & more!

TIME & COVERAGE

Usage and treatment time varies depending on space and configuration.

1 gallon of Zero Hazard Solution will treat approximately:

- 8,000 -16,000 square feet
- 55 motorcoaches/buses
- 100 sedans/vans/SUVs

Estimated treatment time:

- Office/Warehouse Space: 13,000-23,000 square feet per hr
- 55 passenger vehicle: 3 mins
- 1-15 passenger vehicle: 2 mins

SPECIALIZED PRODUCT TYPES

While it is strong enough to destroy dangerous organisms, Zero Hazard is non-toxic and safe around humans, pets, electronics, woods, fabrics, plants, machinery, plastic, etc. The active ingredient used in our solution is Hypochlorous Acid which is a naturally occurring substance that white blood cells produce to help fight off infection, so it's in your body! As a result, it makes for a safe sanitizing solution in all environments!
